Summary

MERN Stack Developer with 1 year of professional experience building and deploying full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in JavaScript (ES6+), TypeScript (fundamentals), REST API development, JWT authentication, and responsive UI design. Experienced in developing scalable backend services, component-based frontend architectures, and database-driven applications. Familiar with Python (Django), Git, Docker, and Agile workflows. Passionate about clean code, performance optimization, and continuously learning modern web development technologies.

Skills

MERN Stack: MongoDB, Express.js, React.js (Hooks, React Query, React Router, Context API), Node.js

Languages: JavaScript (ES6+), TypeScript (fundamentals), Python, SQL, HTML5, CSS3

Frontend: React.js, Responsive Web Design, Bootstrap, Tailwind CSS (basics), LESS/SASS, Vite, Component-Based Architecture

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, Session Management, Bcrypt

Databases: MongoDB (Mongoose ODM), PostgreSQL, MySQL, SQLite

Tools & DevOps: Git, GitHub, Docker, Postman, npm, VS Code, Netlify, Vercel, AWS (awareness)

Soft Skills: Problem Solving, Team Collaboration, Communication, Attention to Detail, Continuous Learning

Experience

Full-Stack MERN Developer

Jan 2025 – Dec 2025

Adwaitra Technologies Pvt. Ltd., Hyderabad

Tools: React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+), Git, Docker

- Developed and maintained a **production-grade MERN stack EdTech platform** — building a React.js component-based frontend, Express.js REST API backend, and MongoDB database layer serving thousands of concurrent users.
- Designed and implemented **secure REST APIs** for user authentication (JWT + Bcrypt), role-based access control, course management, progress tracking, and real-time backend communication across the application stack.
- Built **reusable React.js components** using Hooks, React Query for server state management, and React Router for client-side navigation, delivering fully responsive, cross-device user interfaces.
- Improved overall **application performance by 35%** through MongoDB query optimization, efficient API response handling, lazy loading, code splitting, and JavaScript ES6+ refactoring techniques.

Python Developer & Backend Intern

Jul 2021 – Sep 2021

iBase Electrosoft LLP, Amravati, Maharashtra

Tools: Python, JavaScript, SQL, Git

- Developed **server-side backend scripts and data processing workflows** in Python and JavaScript, gaining solid understanding of backend architecture, database management, and API-driven communication.
- Wrote and optimized **SQL queries** across relational databases, collaborated with senior developers on debugging and code quality, and documented technical findings for cross-functional team members.

Projects

TaskNova – AI-Powered Task Management App | React.js, Node.js, Express.js, MongoDB, JWT

Jan 2026

- Architected a **full-stack MERN application** with Django REST Framework backend integration, implementing JWT authentication, role-based access control, and a modular, scalable API architecture.
- Built a **React.js productivity dashboard** using Hooks, React Query, and React Router with dynamic charts, task analytics, and AI-powered insights — deployed on Vercel with optimized frontend performance.

E-Learning Platform | React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+)

Jan 2025 – Dec 2025

- Built a **scalable MERN stack web application** from scratch — scaffolding the Express.js server, designing MongoDB schemas with Mongoose ODM, and developing a responsive React.js frontend with component-based architecture.
- Implemented **secure user authentication, course CRUD operations, and payment integration APIs**, applying TypeScript fundamentals for type-safe component props and improving overall code reliability.

Real-Time Chat Application | React.js, Node.js, Express.js, MongoDB, Socket.io, JWT

Mar 2026

- Developed a **real-time full-stack chat application** using Socket.io for WebSocket-based bidirectional communication, Node.js/Express.js backend, MongoDB message storage, and a React.js chat interface.
- Implemented **JWT-based authentication, private messaging rooms, and online user tracking** with responsive UI components — demonstrating advanced MERN stack integration and real-time data handling skills.

Certifications & Training

- MERN Stack Development Course
- Complete Web Development Bootcamp
- Complete 2026 Python Bootcamp: Learn Python from Scratch
- GenAI Powered Data Analytics Job Simulation

Apna College, 2025

Udemy, 2025

Code With Harry, Feb 2026

Tata Consultancy Services / Forage, Feb 2026

Education

Bachelor of Technology (B.Tech), Computer Engineering

Nov 2022 – Jun 2025

Nagpur University

Diploma in Computer Engineering

Aug 2019 – Jul 2022

Government Polytechnic
