Summary

Results-driven Data Analyst and Machine Learning Engineer with hands-on experience in Python, SQL, Big Data analytics, NLP, and Generative AI workflows. Skilled in building end-to-end ML pipelines, performing EDA and statistical analysis, engineering features, and translating raw data into actionable business insights. Experienced in RAG-based GenAI frameworks, LLM prompt engineering, and NLP text processing. Proficient in Power BI, Pandas, NumPy, Scikit-learn, Git, and Docker. Adept at communicating analytical findings to cross-functional stakeholders and executing data-driven operational tasks in fast-paced environments.

Skills

Machine Learning & AI: Scikit-learn, Predictive Modeling, Classification, Regression, Feature Engineering, Model Training & Evaluation, Hyperparameter Tuning

NLP & Generative AI: NLP, Text Processing, Tokenization, Embeddings, Chunking, RAG Pipelines, LLMs, Prompt Engineering, GenAI Frameworks

Big Data & Analytics: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Complex Queries, PL/SQL), EDA, Descriptive & Inferential Statistics, Data Mining

Visualization & Reporting: Power BI (DAX, KPIs), Tableau, Advanced MS Excel (Pivot Tables, VLOOKUP, Power Query), Data Storytelling

Data Engineering: ETL Pipelines, Data Cleaning, Data Transformation, Data Quality, PostgreSQL, MySQL, SQLite, Oracle

DevOps & Tools: Git, GitHub, Docker, CI/CD Basics, Jupyter Notebook, VS Code

Soft Skills: Analytical Thinking, Communication, Problem Solving, Team Collaboration, Attention to Detail

Experience

Full-Stack MERN Developer

Jan 2025 – Dec 2025

Adwaitra Technologies Pvt. Ltd., Hyderabad

Tools: React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+), Git, Docker

- Developed and maintained a **production-grade MERN stack EdTech platform** serving thousands of concurrent users — building a React.js component-based frontend, Express.js REST API backend, and MongoDB database layer end-to-end.
- Built **reusable React.js components** using Hooks, React Query for server state management, and React Router for client-side navigation, translating UI designs into fully responsive, cross-device interfaces.
- Improved **application performance by 35%** through MongoDB query optimization, lazy loading, code splitting, and ES6+ refactoring; wrote unit tests and participated in **code reviews and Agile sprint ceremonies**.

Python Developer & Machine Learning Intern

Jul 2021 – Sep 2021

iBase Electrosoft LLP, Amravati, Maharashtra

Tools: Python, Pandas, Scikit-learn, NumPy, Excel

- Built **end-to-end ML pipelines** covering data preprocessing, feature engineering, model training, evaluation, and inference using Scikit-learn and Pandas; achieved **82% classification accuracy**.
- Performed **NLP-style text preprocessing and data cleaning** on structured datasets, applying tokenization and feature extraction techniques to prepare data for downstream machine learning models.
- Generated **structured analytical reports** documenting model findings, data quality observations, and ML performance metrics for senior data scientists and business stakeholders.

Projects

Customer Churn Prediction – ML Pipeline | Python, Scikit-learn, Pandas, NLP, EDA 🔄

Feb 2026 – Mar 2026

- Built a **complete end-to-end ML pipeline** analyzing 7,000+ telecom customer records—performing Big Data EDA, feature engineering, NLP-based text feature extraction, and predictive model training using Scikit-learn.
- Applied **classification algorithms, hyperparameter tuning, and statistical analysis** to surface that 38% of churned users held short-tenure monthly contracts—generating data-driven recommendations for retention strategy.

Iris Flower Classification – ML Engineering | Python, Scikit-learn, Pandas, NumPy, Matplotlib 🔄

Mar 2026 – Apr 2026

- Designed and implemented a **multi-class ML classification pipeline** on the Iris dataset—performing EDA, statistical feature analysis, data preprocessing, and training multiple classification models (KNN, SVM, Decision Tree, Logistic Regression).
- Conducted **model evaluation and comparison** using accuracy scores, confusion matrices, and cross-validation metrics, selecting the optimal algorithm and documenting performance insights as structured ML engineering reports.

Certifications & Job Simulations

- The Ultimate Job Ready Data Science Course
- GenAI Powered Data Analytics Job Simulation
- Data Science Job Simulation
- Data Analytics Job Simulation
- Foundations: Data, Data, Everywhere – Google Data Analytics

Code With Harry, Feb 2026

Tata Consultancy Services / Forage, Feb 2026

Lloyds Banking Group / Forage, Feb 2026

Deloitte Australia / Forage, Jul 2025

Coursera / Google, Dec 2023

Education

Bachelor of Technology (B.Tech), Computer Engineering

Nov 2022 – Jun 2025

Rashtrasant Tukadoji Maharaj Nagpur University

Diploma in Computer Engineering

Aug 2019 – Jul 2022

Government Polytechnic, Arvi
