Summary

MERN Stack Developer with 1 year of professional experience building, testing, and deploying full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in JavaScript (ES6+), TypeScript (fundamentals), REST API development, JWT authentication, WebSockets, and responsive UI development. Experienced in component-based architecture, React Hooks, server state management with React Query, and Node.js backend services. Skilled in Python (Django REST Framework), Git, Docker, and Agile workflows. Passionate about clean code, performance optimization, and delivering high-quality user experiences.

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+, Closures, Promises, Async/Await), TypeScript (fundamentals), React.js (Hooks, React Query, React Router, Context API), Next.js (basics), TailwindCSS, Bootstrap, LESS/SASS, Vite, Responsive & Accessible Design

Backend & APIs: Node.js, Express.js, Django REST Framework, REST APIs, WebSockets (Socket.io), JWT Authentication, Bcrypt, Middleware, Session Management

Databases: MongoDB (Mongoose ODM), PostgreSQL, MySQL, SQLite

Testing & Code Quality: Vitest, Jest (familiarity), Pytest, Unit Testing, ESLint, Code Reviews, Debugging

Tools & DevOps: Git, GitHub, Docker, Postman, npm, VS Code, Vite, Vercel, Netlify, AWS (awareness)

CS Fundamentals: Data Structures & Algorithms, OOP, SDLC, Agile/Scrum, Modular Code Design

Soft Skills: Problem Solving, Team Collaboration, Communication, Attention to Detail, Continuous Learning

Experience

Full-Stack MERN Developer

Jan 2025 – Dec 2025

Adwajra Technologies Pvt. Ltd., Hyderabad

Tools: React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+), Git, Docker

- Developed and maintained a **production-grade MERN stack EdTech platform** serving thousands of concurrent users — building a React.js component-based frontend, Express.js REST API backend, and MongoDB database layer end-to-end.
- Built **reusable React.js components** using Hooks, React Query for server state management, and React Router for client-side navigation, translating UI designs into fully responsive, cross-device interfaces.
- Improved **application performance by 35%** through MongoDB query optimization, lazy loading, code splitting, and ES6+ refactoring; wrote unit tests and participated in **code reviews and Agile sprint ceremonies**.

Python Developer & Backend Intern

Jul 2021 – Sep 2021

iBase Electrosoft LLP, Amravati, Maharashtra

Tools: Python, JavaScript, SQL, Git

- Developed **server-side backend scripts and data workflows** in Python and JavaScript, gaining solid understanding of backend architecture, REST API design, and database management under senior developer guidance.
- Wrote and optimized **SQL queries**, collaborated on debugging and code quality improvements, and documented technical findings — contributing to a collaborative, knowledge-sharing development environment.

Projects

TaskNova – AI-Powered Task Management App | React.js, Django REST, PostgreSQL, TailwindCSS 🚀

Jan 2026

- Architected a **full-stack AI-powered web application** with React 18 (Hooks, React Query, React Router, Vite) frontend and Django REST Framework backend, delivering AI-powered productivity insights, analytics dashboards, and recurring task management features.
- Implemented **JWT authentication, role-based access control, dark/light mode**, and real-time UI updates with React Query; wrote **unit tests using Vitest (frontend) and Pytest (backend)** for production-grade reliability.

Adwajra E-Learning Platform | React.js, Node.js, Express.js, MongoDB (MERN) 🚀

Jan 2025 – Dec 2025

- Built a **scalable production MERN application** from scratch — scaffolding the Express.js server, designing MongoDB schemas with Mongoose ODM, and developing a responsive React.js frontend with component-based architecture.
- Implemented **secure JWT authentication, course CRUD operations, and payment integration APIs**, applying TypeScript fundamentals for type-safe component props and clean REST API error handling across the stack.

Real-Time Video Conferencing App | React.js, Node.js, Socket.io, WebRTC, MongoDB, JWT 🚀

Mar 2026

- Developed a **real-time video conferencing and chat application** using WebRTC for peer-to-peer media streaming and **Socket.io** for WebSocket-based bidirectional signalling, with a React.js interface and Node.js/Express.js backend.
- Implemented **JWT authentication, private rooms, online user tracking**, and responsive UI components — demonstrating advanced full-stack MERN integration, real-time data handling, and production deployment skills.

Certifications & Training

- MERN Stack Development Course
- Complete Web Development Bootcamp
- GenAI Powered Data Analytics Job Simulation

Apna College, 2025

Udemy, 2025

Tata Consultancy Services / Forage, Feb 2026

Education

Bachelor of Technology (B.Tech), Computer Engineering

Nov 2022 – Jun 2025

Rashtrasant Tukadoji Maharaj Nagpur University

Diploma in Computer Engineering

Aug 2019 – Jul 2022

Government Polytechnic, Arvi
